Japan Healthcare Venture Summit 2023

<https://mediso.mhlw.go.jp/jhvs2023/en/index.html>

## Overview of the event

Japan is one of the few countries that develop new drugs. The country also has a high potential for innovation including the academia's superior basic researches and small and medium enterprises' manufacturing skills. On the other hand, it has been pointed out that this potential is not optimally utilized. Especially healthcare ventures, which to aim to have pharmaceutical products, medical devices and regenerative medicines that are put into practical use, are expected to fully unleash their capabilities and lead healthcare innovation in Japan as in the cases of Europe and the U.S.

Ministry of Health, Labour and Welfare is implementing various initiatives for establishing a positive cycle (ecosystem) for promoting practical applications of superior seeds discovered in the academia and other sectors and for fostering healthcare ventures.

In order to further accelerate these initiatives, we will hold the Japan Healthcare Venture Summit 2023 at Pacifico Yokohama, as we did last year. The Summit will have healthcare ventures place their exhibit booths and make presentations to promote their matching and networking with key individuals from major companies, financial institutions, research institutes etc. Also, it will prepare an environment including symposiums and exchanges in the venue that will help related parties deepen their understanding of regulations, systems, and initiatives for supporting ventures.

We sincerely hope that this Summit will be attended by healthcare ventures and academia that have seeds that are expected to lead to innovative pharmaceutical products, medical devices and regenerative medicines. We expect this Summit to serve as an opportunity to taking a step forward toward putting the seeds into practical use.
